

Help
me be
compliant

Help me be compliant

SecureCo is Australia's trusted PCI DSS Service Provider for businesses who want to process payments in a highly secure and compliant way.

Contact Centre Solutions

A range of services that make taking payments over the phone or via contact centre, PCI compliant, safe & secure.

Is it right for you?

Are you a business taking credit card payments whilst needing to maintain PCI-DSS compliance? Whether via phone, webchat or SMS, SecureCo's Contact Centre suite of solutions is ideal for you.

What we do for you

As a Level 1 certified PCI DSS Service Provider, we will partner with you to guide you through how to make your contact centre PCI Compliant.

Solutions & Benefits

- **Secure Phone Payments:** Enables your agent to remain on the phone whilst taking a payment, improving the customer experience and taking the entire contact centre/agent out of PCI DSS scope.
- **Secure IVR Payments:** A simple payment method that enables your customers to pay their bill 24/7, 365 days a year without the need for agent contact or having card data enter your environment.
- **Secure WebChat & SMS Payments:** Accept Webchat or SMS based payments by directing the customer to a fully customisable pre-populated Hosted Payment Page.

eCommerce Solutions

Our PCI DSS eCommerce solutions are purpose built to Australian standards.

Is it right for you?

Does your website need to take customer payments and transact these with the bank? Do you need to retain cardholder data? Do you want to send bill notifications to your clients? Then our eCommerce services are recommended for you.

What we do for you

SecureCo's eCommerce solutions deliver a single integration point to all major banks across Australia, providing optional hosting and payment notifications.

Solutions & Benefits

- **Payment Gateway:** A highly resilient Payment Gateway includes card tokenisation of card data for additional security
- **Bill Presentment:** Enables a business to send bill payment notifications using SMS, WhatsApp, Messenger and other notification channels.
- **Web Hosting:** Moves your payment pages to our highly secure environment, giving you the flexibility to create secure pages with a consistent look and feel whilst adding an additional layer of security.

Data Solutions

We can scan for sensitive data in your environment and protect it by moving to our highly secure hosting facility.

Is it right for you?

Do you need to retain the personal information of your clients and customers? Are you aware where it is stored and if it is protected from hackers? Have you scanned your environment for any sensitive card data or personal information hidden in your network? Then talk to us about how our data solutions can help protect your business today.

What we do for you

Our Secure Platform encrypts your data to PCI-DSS standards while our Enterprise Data Scan solution ensures you can quickly and effortlessly find sensitive and non-compliant data in both structured or unstructured environments.

Solutions & Benefits

- **Secure Platform:** house sensitive data in our secure and encrypted Australian data centres.
- **Enterprise Data Scan:** Find all 10 major card brands & 160+ combinations of PAN structures in your environment. As it is pre-configured with over 200+ personal data types, it is a turnkey solution.
