Help me get new insights

SecureCo

Help me get new insights

The SecureCo Analytics team provided trusted insights on your PCI-DSS compliance risk, giving actionable consultancy to safeguard your business before it is attacked.

Enterprise sized problems solved with SecureCo Insights

With ever increasing volume and complexity of data hacks, it is challenging and time consuming for businesses to gain new insights into how to improve their PCI security.

Businesses need to know how to stay ahead by getting insights into how effectively their PCI compliance program is performing. Enterprises need to how their transactions are being distributed amongst the banks, that they are not being compromised en-route and understand causes of any failed transactions. SecureCo's Insights provides you with this level of visibility and more.

SecureCo Solves this for you

SecureCo's Insights is typically a one-hour in-person consultation provided by our security experts delivering an in-depth presentation, insightful analysis and commentary to help your business stay secure.

SecureCo Insights

Gain actionable insights across a range of business performance dimensions and use these to improve your business before it is attacked:

Payment Gateway Insights

→ Receive service availability metrics and transaction volumes per day or month.

Contact Centre Insights

→ Get operational insights like availability, number of calls, call quality and much more.

Service Management Insights

→ Understand how many incidents and service requests were logged, the severities of faults, resolution times and types of outstanding tickets.

Secure Hosting Insights

→ Availability, utilisation of CPU, memory, disk and network (WAN) links.

Managed Disaster Recovery (DR) Insights

→ Plan better by knowing the availability, RPO (Recovery Point Objective) and visibility of which servers are DR protected.

Risk Management Insights

→ Risk mitigation planning with SecureCo SDM analysis and identification of PCI compliance risk.

Key benefits:

→ **In-depth analysis:** Providing metrics and data inputs to help futureproof your payment, technology & security strategies

→ **Risk identification:** Identify current and potential risks

→ **Cost reduction:** Access reporting metrics that can drive efficiencies such as which bank is more cost effective to settle with.

→ **Identify training and education needs:** Identify any user education requirements based on staff ticket logging and behaviour patterns

→ **Improve capacity planning:** Identify what is happening in your business at any point of time throughout the month and adjust capacity in real time.

→ **Plan Investments:** Understand where investments need to be made such as CPU, memory, or disk capacity planning due to growth.
