

Help me understand PCI and PII

Help me understand PCI & PII

SecureCo offers a range of tools which help you understand PCI DSS and PII – no matter your business level of complexity it is important to know your level of risk and what to do about it.

PCI Health Check

SecureCo's online questionnaire gives you a way to check your business's level of PCI DSS (Payment Card Industry Data Security Standard) compliance, risk and what you need to do about it, in only a few short minutes.

Is it right for you?

Do you need to know if your business is meeting the 2018 PCI-DSS compliance standards? Do you want to know which areas of your business are in scope for PCI Compliance? If yes, then completing this quick and easy questionnaire is what you need to do.

What it does for you

PCI Health Check assesses your level of compliance and risk, based on how your business handles and stores Credit Card information across 12 different PCI dimensions.

Features & Benefits

- **Online self-assessment:** SecureCo's own questionnaire that covers Australian PCI-DSS requirements – completed at your own pace.
- **Relevance:** Checks the most likely areas of PCI breaches, provides a breakdown of risk areas and assesses each independently.
- **Provides Benchmarking Metrics:** Enabling you to compare risk profile to what SecureCo has visibility to across multiple industries.
- **Obtain a SecureCo Risk Score:** An easy to understand assessment that rates your relative risk level.

Sensitive Data Scan

This is a tool that searches for sensitive card or PII data (personally Identifiable Information) across your systems which are in scope for PCI DSS.

Is it right for you?

Have you scanned your network during the past six months for any hidden sensitive card data? Are you taking credit card details in a onetime transaction or as a recurring payment? Then SecureCo's Sensitive Data Scan is the ideal solution to give you peace of mind.

What it does for you

SecureCo's powerful cardholder data discovery tool searches networks, servers and cloud for cardholder data. It's the tool of choice for more than 300 PCI Qualified Security Assessors (QSAs).

Features & Benefits

- **Find all major payment card brands.** Data detection for 10 major card brands across 160+ combinations of PAN structures.
- **Accurate Reporting:** Generate a cardholder data discovery report to prove that you are PCI compliant.
- **Powerful Remediation:** Data security risks can be securely quarantined or masked using our remediation tools without leaving the software.

Compliance Consult

Compliance Consult is our advisory service, which provides a custom assessment of your business's level of risk and what needs to be done to be compliant and secure.

Is it right for you?

Have you made changes or upgrades to your internal environment? Do you need to undertake a pre-PCI-DSS check ahead of your annual compulsory audit? Do you have a complex or legacy operating environment? Then Compliance Consult is designed to help you understand your PCI compliance requirements.

What it does for you

We provide Qualified Security Assessors (QSA) who provide PCI consultation in identifying if a business is compliant with security standards related to processing transactions via a payment card.

Features & Benefits

- **Full Risk assessment:** Evaluation of your security infrastructure, procedures, policies, networks and systems.
- **Vulnerability Ranking:** Any vulnerabilities found will be ranked, providing you a clear plan of which areas need to be addressed first.
- **Mitigation Management:** Receive advice ranging from staff training to implementation of compliance tools.
